PROFILE

I'm a 2023 graduate with a Bachelor of Arts and 1 year of hands-on experience in front-end development and WordPress website creation. I've built clean, responsive websites using HTML, CSS, JavaScript, and Bootstrap, and have developed and customized sites on platforms like WordPress and Wix. I also use tools like Canva for visual design. Currently, I'm focused on growing my back-end skills by learning PHP, Laravel, AJAX, and React as I work toward becoming a confident full-stack developer.

WORK EXPERIENCE

WEB DEVELOPER

Webbyfish Technologia

December 2024 - Present

- Designed and developed fully responsive websites using HTML, CSS, JavaScript, and Bootstrap, ensuring a smooth user experience across all devices.
 - Built and customized WordPress websites, handling themes, plugins, and full-site development based on client needs.
 - Contributed to design and layout using Wix and Canva, collaborating with teams to deliver visually appealing, user-focused sites.
 - Gained practical experience with PHP for basic backend tasks, actively expanding skills toward full-stack development.
-
